Customization is possible for DORO® ADF NON-STICK Bipolar Forceps. Please see the respective style page for customization details.
Revolutionary Adjustable Dissecting Force (ADF) provides quick adjustment of the tensile strength and the spreading dissecting force as needed for grasping, manipulating, dissecting and coagulating. Just turn the wheel to dial-in your personal preferences.

The use of DORO® ADF NON-STICK Bipolar Forceps may reduce the number of forceps required during surgery.

## Sterilization Tray

DORO® Sterilization Tray
for 6 DORO® NON-STICK Bipolar Forceps
Item no. 5011.102
DORO® NON-STICK Bipolar Forceps

Features

No sticking
NON-STICK
Tips are solid noble silver. Not a coating. Provides high thermal diffusivity and prevents tips from overheating, eliminating sticking and charring of tissue. Uses lower power setting. No need to scrape the tips clean. Non-stick properties are retained for the lifetime of the forceps.

Pinpoint Coagulation
Dual Tip Action
Design allows pinpoint coagulation for fine microsurgery or coagulation of a larger area when the forceps tips are planed together.

Planed Coagulation
Guide Keeps Tips Precisely Aligned
Guides on the forceps keep tips aligned and prevent crossing and scissoring. This is especially important on longer forceps.

Guide

Bipolar Forceps with Irrigation
Optimal Tissue Manipulation
Streamlined design: Irrigation lines are inlaid into most of the handle and connector for low profile design for maximum field of view. Irrigation aids in clearing remaining blood from the surgical site and in the evacuation of hematomas. Irrigation also dissipates heat during long procedures.
